ENERGY SYSTEMS AND POLICY

Contents of Volume 15

Number 1

The Administrative Costs of Energy Conservation Programs
Linda Berry 1

The Economics of Alternative Fuels for Power Generation: The Case of Taipower
George J. Y. Hsu and York Y. C. Liaw 23

The Economics of Heat Mining: An Analysis of Design Options and Performance Requirements of Hot Dry Rock (HDR) Geothermal Power Systems
Jefferson W. Tester and Howard J. Herzog 33

A Cost-Minimization Planning Model for the Coal Sourcing/Transport Network Problem, Emphasizing Environmental Emission Restrictions
William P. Allman 65

Some Cautionary Comments on Reopening the Energy Policy Debate
Henry R. Linden 75

Errata
Analytics of Demand-Side Conservation Programs
Franz Wirl 85

Number 2

Imputed Outage Costs Under a Proposed Curtailable Rate Program in Taiwan
George J. Y. Hsu, Pao-Long Chang, and Tser-Yieth Chen 87

Oil and Gas Industries in Central and Eastern Europe and in the USSR: Status, Problems, and Prospects
Dr. Eugene Nadezhdin 99

Estimating the Agricultural Demand for Energy in the Presence of Measurement Error in the Data
Noel D. Uri 121

Energy Consumption and Resultant Air Pollution: An ARIMA Forecasting Model for Taiwan
George J. Y. Hsu and Mei-Chi Liu 137

How Much Do Electric Customers Want to Pay for Reliability? New Evidence on an Old Controversy
Chi-Keung Woo, Roger L. Pupp, Theresa Flaim, and Robert Mango 145

Number 3

An Analysis of Heating Fuel Prices During the Winter of 1989–90
Ronald J. Sutherland 161

Energy and Environment: The Light Path
Jesse H. Ausubel 181

Tracking the Emission of Carbon Dioxide by Nation, Sector, and Fuel Type: A Trace Gas Accounting System (TGAS)
Robert K. Kaufmann, Berrien Moore III, Steve Piccot, Teresa Lynch, and P. Jeff Chappell 189

Existing Capacity—The Key to Reducing Emissions
Clinton J. Andrews and Stephen R. Connors 211

Number 4

Keynote Address: Energy, Risk, and Environment
Wolf Häfele 237

Combining Decision Support Tools and Knowledge-Based Approach for the Development of and Integrated System for Regional Energy Planning
V. Assimakopoulos, C. Charalambopoulos, and J.-E. Samoulidis 245

The Role of Evaluation in Creating the Analytical Foundation of Utility Demand-Side Management Programs
Erich Hirst and John Reed 257

Costs and Results of Federal Incentives for Commercial Nuclear Energy
Roger H. Bezdek and Robert M. Wendling 269

The Impact of Oil-Price Shocks on Hawaii's Economy: A Case Study Using Vector Autoregression
Chennat Gopalakrishnan, Xijun Tian, and Duke Tran 295

The Distributed Utility: Technology, Customer, and Public Policy Changes Shaping the Electrical Utility of Tomorrow
Carl J. Weinberg, Joseph J. Iannucci, and Melissa M. Reading 307
